What's in the *Toolkit*? Did I hear you say...

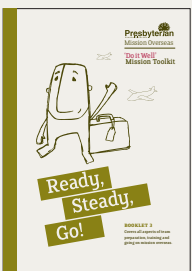

The Toolkit consists of five booklets. The first four give advice and helpful tips for overseas mission teams, from the early stages of trying to decide whether to go or not, through planning and preparation, going and being overseas, coming home and dealing with the experience. The final booklet contains details of useful additional resources, both books and web sites, along with samples of some of the all-important forms that most teams require.
